

BXJG SERIES MILITARY SLIP RING MANUAL

Military conductive slip rings are a general term for conductive slip rings specifically designed for military equipment. They are also known as military slip rings. With the development of science and technology, countries are constantly developing New military equipment. These new military equipment require 360 degree rotation and transmission of current or control signals in some critical areas, greatly reducing installation space and improving the performance of military products in terms of structure and performance.

The requirements for slip rings in military industry are higher than those in ordinary civilian fields. Its technical indicators are: stable performance, long service life, maintenance free, and can fully meet the special requirements of military equipment in different application fields such as high protection level, high and low temperature resistance (-55~240~C), vibration resistance, impact resistance, and high voltage. Resistance and low electrical noise (less than 5m). Special requirements such as isolation degree less than 60dB, extremely low signal transmission loss, etc. Therefore, when manufacturing military conductive slip rings, from the perspective of material quality, it is necessary to ensure that military materials are used from the inside out. The conductive ring and brush wire should be made of expensive contact materials. To ensure wear resistance, stability, and reliability, stainless steel should be selected as the shell material to ensure the required protection level. In the machining process, it is required to increase the precision and improve the stability of the sliding ring.

The main fields of military conductive slip rings

1. Shipborne radar turntable.
2. Rotating turrets on military armored vehicles.
3. Military mixer.
4. Military robots (mine sweeping).
5. Airborne radar turntable/guidance/air warning system.
6. Ship electric thrusters, radar guidance, missile launch and defense systems.

Product advantages

Strict and precise technical parameter requirements

Metal to metal contact material

Long service life, maintenance free, and stable performance

Adapt to harsh working environments, such as high and low temperatures (-55 °C~+240 °C), shock resistance, vibration resistance, immersion resistance, salt spray, drop resistance, wet and hot weather, etc

High protection level (Ip68)

Low electrical noise, isolation degree>60dB, extremely low signal transmission loss;

BXJG-BZ075-58-2RF

MILITARY RADAR SLIP RING SERIES

Technical Parameter

Mechanical technical indicators	Electrical Specifications
Number of rings: 58 ring	Rated voltage: 0~120VAC/120VDC
Rated current: 6A/14/ring, 2A/37/ring,1A/7/ring	Insulation resistance: $\geq 500M\Omega/1000VDC$
Rated speed: 3~250RPM	Dielectric strength: 500VAC@50Hz, 60s
Operating temperature: -40°C~80°C	Dynamic resistance change value: $\leq 10m\Omega$
Working humidity:0~85% RH	Static contact resistance: $\leq 50m\Omega$
Contact material: precious metal	Protection class: Ip65
shell material: Aluminum alloy	

RF channel characteristics

Number of microwaves	Frequency	Power	Insertion Loss	VSWR
2	$0GHz \leq f \leq 4.5GHz$	50w@1GHz	$\leq 1.5db$	≤ 1.3

Dynamic resistance change value	≤10MΩ	

Mechanical technical indicators

parameter	value	parameter	value
Number of rings	25 Rings	Working humidity	0~85% RH
Rated current	2A/24/Ring,HD-SDI/1/Ring	Contact material	precious metal
Rated speed	0~250RPM	shell material	Aluminum alloy
Operating temperature	-30°C~80°C	Protection clas	IP65
working life	100Million revs		

Product images

If there are changes in the appearance and size of the product, the actual product should prevail.

Electrical Specifications

parameter	Power	Signal
Rated voltage	0~240VAC/VDC	0~240VAC/VDC
Insulation resistance	≥600MΩ/500VDC	≥600MΩ/500VDC
Dielectric strength	1000VAC@50Hz,60s	
Dynamic resistance change value	≤10MΩ	

Mechanical technical indicators

parameter	value	parameter	value
Number of rings	13 Rings	Working humidity	0~85% RH
Rated current	2A/12/Ring,HD-SDI/1/Ring	Contact material	precious metal
Rated speed	0~250RPM	shell material	Aluminum alloy
Operating temperature	-30°C~80°C	Protection clas	IP65
working life	100Million revs

BXJG-BBC118

MILITARY CENTRIFUGE SLIP RING SERIES

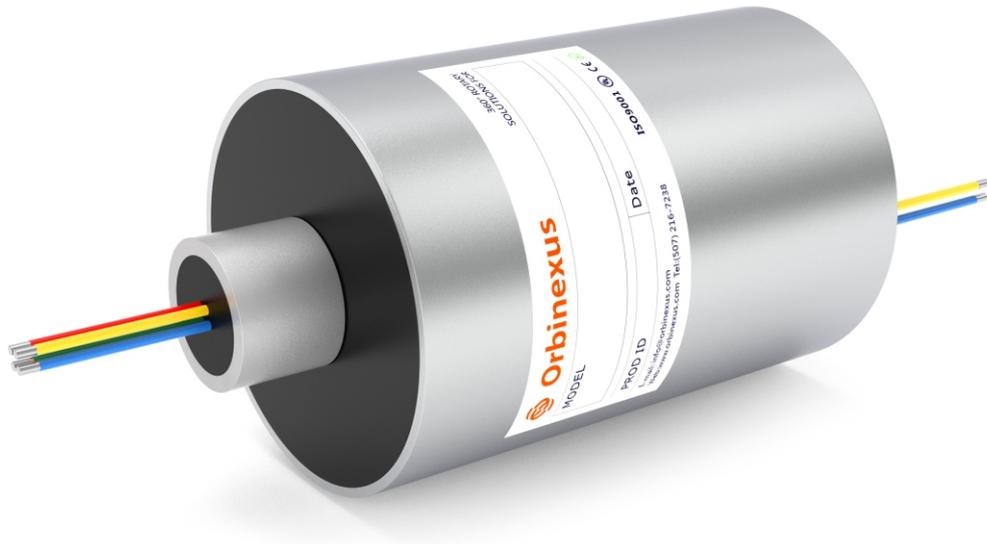

Electrical Specifications

parameter	Power	Signal
Rated voltage	0~240VAC/VDC	0~240VAC/VDC
Insulation resistance	≥600MΩ/500VDC	≥600MΩ/500VDC
Dielectric strength	500VAC@50Hz,60s	
Dynamic resistance change value	≤10MΩ	

Mechanical technical indicators

parameter	value	parameter	value
Number of rings	7 Rings	Working humidity	0~85% RH
Rated current	2A/6/Ring,HD-SDI/1/Ring	Contact material	precious metal
Rated speed	0~250RPM	shell material	Aluminum alloy
Operating temperature	-30°C~80°C	Protection clas	IP65
working life	100Million revs
