

BFORJ200 SERIES

2 Channel (FORJ) Fiber Optic Slip Rings

BFORJ200 fiber optic slip ring support 2 channel fiber optic (SM / MM) . It can perfect transmit data on 360 ° rotating . It is also especially suitable for occasions where it needs to transmit large volume data / signal from permanent position to rotation position under intermittent , continuous or discontinuous rotating , which can improve mechanical property , simplify system operation and avoid the rotating of turning joints destroying fiber optics

Features

- Low insertion loss , high rotation speed
- Non-contact , zero friction , long working life 1 channel can achieve one hundred million revolutions
- Small size , light weight , high sealing class
- Fiber optic transmitting signal , no electromagnetic interference , long-distance transmission
